

K SERIES

Our range of
busbars
that are completely

BLACK

*And there is
a reason...*

**K Series is our 800-5000A
sandwich type power line, i.e.
super compact**

**In our range it stands out for its
typically BLACK painting.**

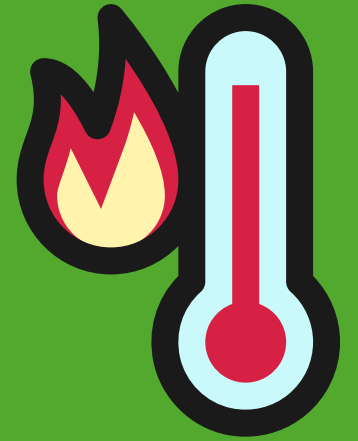

**This choice is not only liked to
an aesthetic *factor*...**

**... But it has real
functionality!**

In fact, K Series is designed to withstand

ELEVATED TEMPERATURES

... and the black paint promotes better heat dissipation along the line, reducing temperature increases.

(it is no coincidence that its icon is the lion, an animal with excellence associated with warmer climates)

**LETS SEE OTHER
TECHNICAL
SPECIFICATIONS...**

ISOLATION

The K Series conductors (in copper or aluminum) are individually insulated with a double polyester film in class F (155°)

This guarantees high short circuit resistance

THE ASSEMBLY

It can be installed **VERTICAL** or **HORIZONTAL**.

And assembly is simplified thanks to the monoblock joints with self cutting screw: the sections are assembled by interlocking.

The compactness of the product facilitates this process.

PROTECTION

**K Series has a degree
protection up to:**

IP55

**This means: suitable for very
humid environments and
protected from water and dust
penetration from all directions.**
